

**GIPPSLAND ENVIRONMENT GROUP INC**  
**Southern Greater Glider (*Petauroides volans*) Detection Report**  
**Adjacent Logging coupe Grassy Ck West Thinning 735-507-0002**  
**Mt Alfred State Forest – Tambo FMA (Gippsland)**

**Date of report: 20 January 2023**

On the night of 30 December 2022, Gippsland Environment Group surveyors recorded two Greater Gliders adjacent to VicForests logging coupe Grassy Ck West Thinning 735-507-0002

The Southern Greater Gliders *Petauroides Volans* were located by spotlight. Location was determined by Garmin 64 GPS.

At waypoints 270 and 271 a photo was taken of the Greater Glider and the GPS location was recorded at the base of the tree.

| 30-12-2022<br>Time | Waypoint ID | Location                    | Distance and bearing | Species                 | Type   | Count |
|--------------------|-------------|-----------------------------|----------------------|-------------------------|--------|-------|
| 10.01 pm           | 270         | 55 H 0539555<br>UTM 5831692 | Base of tree         | Southern Greater Glider | Visual | 1     |
| 11.04pm            | 271         | 55 H 0539906<br>UTM 5831739 | Base of tree         | Southern Greater Glider | Visual | 1     |

Please find attached to this email

- GPX file containing waypoints and track which depicts the location and time/date of the Greater Glider, and
- Photo evidence of the Greater Glider detections and photos of the GPS with location.

Please note the properties of the metadata of the photos of the GPS and photos of the Greater Glider and you will see they are taken with a couple of minutes of each other. The times on the GPS track and waypoints correspond with the time the photos were created.
